

WHAT IS RPCI SET-UP?

RPCI setup was developed using a mix of volatility and momentum principles. It does not take volume into consideration; instead, we manually analyze volume data to gauge demand and supply pressure

Do you use trading systems at all?

We have tested every system under the sun and, amazingly, we have found one that actually works well. It is a very good system, but for obvious reasons, I can't tell you much more about it.

What type of realm does it fall into: contrarian? trend following?

Trend following. The basic premise of the system is that markets move sharply when they move. If there is a sudden range expansion in a market that has been trading narrowly, human nature is to try to fade that price move. When you get a range expansion, the market is sending you a very loud, clear signal that the market is getting ready to move in the direction of that expansion.

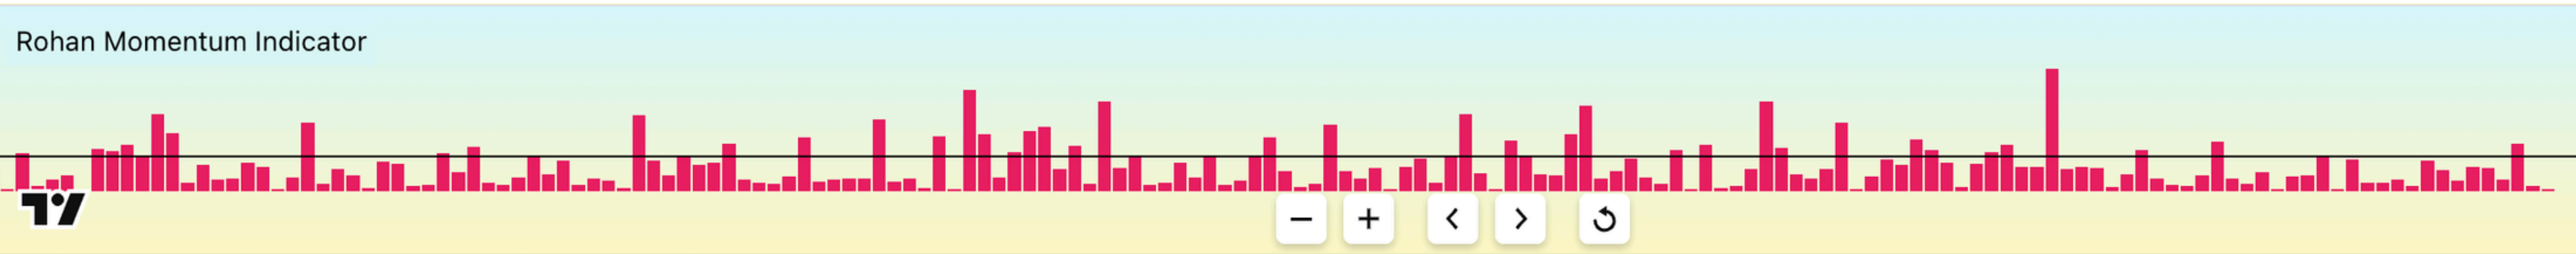

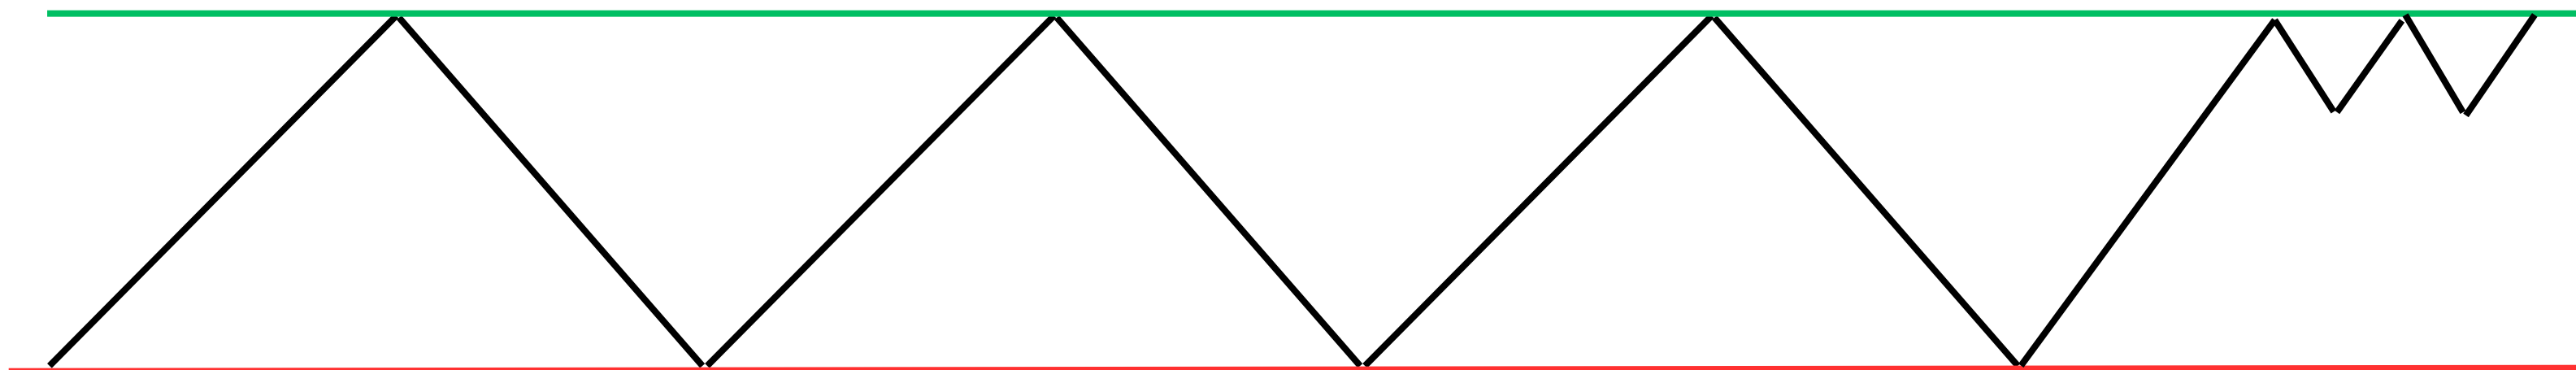

**DOES THIS STRATEGY GIVES
BUY/SELL SIGNAL?**

BUY

SELL

CAN YOU APPLY THIS STRATEGY ON INDICES?

HOW MANY DAYS SHOULD BARS SHRINK ON RPCI TO MEAN SOMETHING?

Just wait for 3-5 days of shrinking bars on RPCI before breakout,
it shows supply and demand are balanced.

WHAT DO THE 3 RPCI SCREENERS HELP US UNDERSTAND?

- (1) First scanner helps you find stocks that have been consolidating for a long time, e.g., 3–5 months or more.**
- (2) Second scanner helps you find stocks that have been consolidating for 2–3 weeks or more.**
- (3) Third scanner helps you find recently listed IPOs that are consolidating.**

WHAT'S THE BLUE DOTS BELOW STOCKS?

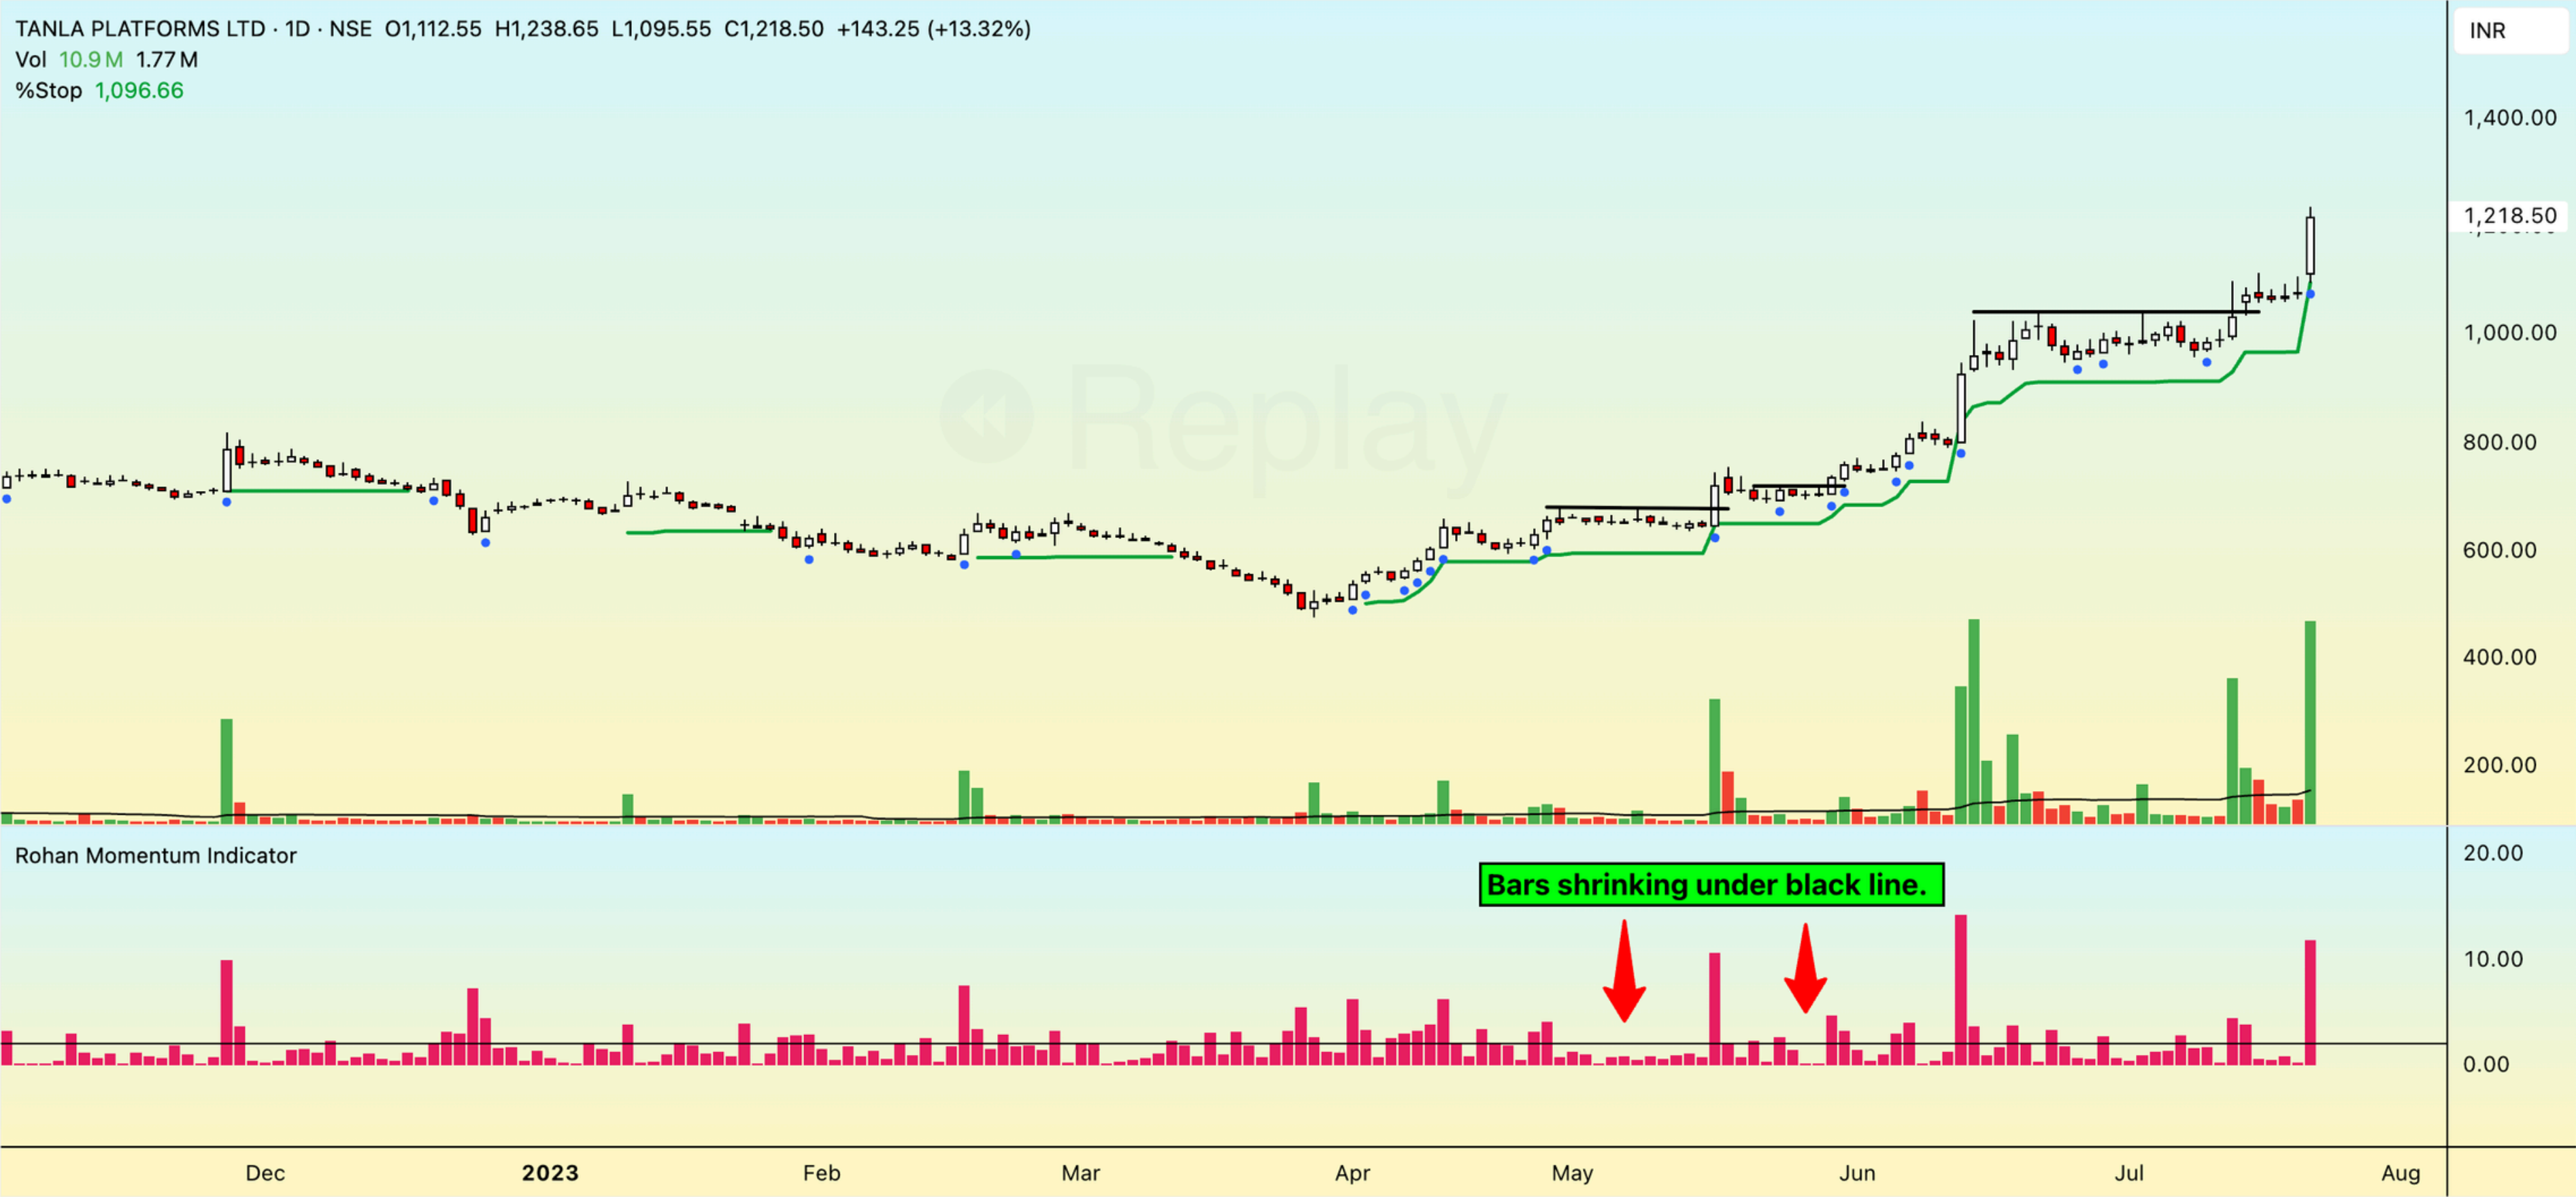

rohan_investor published on TradingView.com, Jun 18, 2025 19:16 UTC+5:30

TANLA PLATFORMS LTD · 1D · NSE O1,112.55 H1,238.65 L1,095.55 C1,218.50 +143.25 (+13.32%)
Vol 10.9M 1.77M

WHEN TO AVOID RPCI SET-UP?

- (1) When you lots of volatility around breakout area.
- (2) Short-term breadth is getting weak as less than 45% stocks are above 10 MA.
- (3) RPCI setup appeared 30% above 50 EMA, so it's now stretched.
- (4) Big red volume bars crossing 50 days average line
- (5) Don't trade RPCI set-ups in 5% circuit stocks
- (6) Don't trade RPCI stocks placed in LT ASM.
